## VISION

*... besides being designed, light in turn designs  
our perception of the world and of life itself ...*

Kundalini starts its activity back in 1996, when it developed the intuition of a new typology of lamps defined as "Object of inner Illumination": lighting design products conceived to create evocative and harmonious light atmospheres.

The corporate vision has since the beginning contrasted most of the lighting productions of a rationalist nature which were fashionable in that period and which mainly intended to hide the light source and promote an environment characterized by volumes of reflected light. The development of the company's project has led to the creation of extremely innovative and outrageous forms of light.

Since Kundalini has been considerably successful, to the point of being in Italy and abroad one of the most published companies in its field. But the great visibility of Kundalini in the media has gone well beyond the strictly professional area of design specialists, since its products have frequently appeared in international movie productions, advertisements, television programmes and video-clips. Historic products such as the floor lamp E.T.A., the Shakti collection, the armchair Hara and recently Bokka or Abyss Spot have already become cult icons for the media worldwide.

Kundalini has been classified by the international contemporary design community as a pioneering company not only for the development of the new themes that it has introduced and which are now very widespread, but also for the innovative spirit of its style and the advanced research work in new production technologies, the new materials and for its ability to revisit traditional craftsmanship techniques in a contemporary key.

More than 10 years after its creation, Kundalini is now a company with extensive experience, which is still oriented towards the identification of cutting-edge research solutions following the fancy, colorful and outrageous mood. The company counts on the cooperation of internationally renowned designers and architects who are sharing and underlining the company mission.

*... la luce non solo è disegnata, ma a sua volta  
disegna la nostra percezione del mondo e della vita ...*

Kundalini inizia la propria attività nel 1996, con l'intuizione di una nuova tipologia di lampade definite Corpi di Illuminazione Interiore: prodotti di lighting design studiati per conferire una luce coinvolgente e armoniosa.

La vision si è posta in antitesi con gran parte delle produzioni illuminotecniche di matrice razionalista allora in auge, orientate principalmente all'occultamento della sorgente luminosa a favore di una concezione dell'ambiente caratterizzato da volumi di luce riflessa. Lo sviluppo del progetto ha dato vita alla creazione di forme di luce estremamente innovative ed altrettanto coraggiose.

Il riconoscimento che Kundalini ha avuto dagli esordi è senza precedenti, ponendola in Italia e a livello internazionale, fra le aziende più pubblicate del proprio settore.

Ma la forte esposizione mediatica di Kundalini è andata ben oltre il raggio di ricezione dell'area degli specialisti di Design, contando numerose apparizioni dei propri prodotti in produzioni cinematografiche, pubblicitarie, televisive e di videoclip internazionali.

Prodotti storici come la lampada da terra E.T.A., la collezione Shakti, la poltrona Hara e più recentemente Bokka

o Abyss Spot sono già icone cult dei media di tutto il mondo.

Kundalini è stata accreditata nell'ambito internazionale del Design contemporaneo come un'azienda pionieristica non solo nello sviluppo delle tematiche che ha introdotto, ma soprattutto per lo spirito innovativo che contraddistingue il suo stile e la ricerca avanzata nell'ambito delle nuove tecnologie produttive, dei nuovi materiali e per la reinterpretazione in chiave contemporanea delle tradizionali lavorazioni artigianali. Kundalini, a più di 10 anni dalla sua fondazione, è oggi un'azienda con una solida esperienza, instancabilmente orientata all'individuazione di traiettorie di ricerca d'avanguardia declinate secondo un pensiero fancy, colorato e coraggioso. Si avvale della collaborazione di designers e architetti di fama internazionale che ne condividono e sottolineano la mission.

*... Licht wird nicht nur entworfen,*

*Licht entwirft wiederum die Welt und das Leben so wie wir beides wahrnehmen...*

Kundalini beginnt die Tätigkeit 1996 mit der Idee einer neuen Typologie von Lampen und definierte diese als „Objekte der inneren Beleuchtung“: Lichtdesign Produkte, die ein umhüllendes Licht und eine harmonische Atmosphäre schaffen. Diese Vision stand in eindeutiger Antithese zu den meisten Produkten im Beleuchtungsbereich rationalistischer Natur, die damals in Mode waren und vor allem darauf ausgerichtet waren die Lichtquellen zu verbergen, zugunsten eines Ambiente mit indirektem Licht. Die Entwicklung des Projektes hat äußerst gewagte und innovative Lichtkreationen geschaffen. Dank der großen Anerkennung die das Unternehmen seit seinem Beginn erhalten hat, gehört Kundalini in Italien sowie auf internationaler Ebene zu den meist gefragten dieser Branche. Jedoch hat die starke Medienpräsenz von Kundalini das Ziel der Design-Spezialisten bei weitem überholt, und Kundalini-Objekte sind in zahlreichen Filmproduktionen, Werbespots, TV-Produktionen und internationalen Videoclips erschienen. Historische Produkte wie die Bodenleuchte E.T.A., die Modelle der Reihe Shakti, der Sessel Hara und die jüngsten Serien Bokka oder Abyss Spot zählen schon jetzt zu den Kult-Ikonen der Medien weltweit. Kundalini ist im Bereich zeitgenössisches Design auf internationaler Ebene als Pionierunternehmen anerkannt worden, nicht nur die Entwicklung der von ihm eingeführten Themen betreffend, sondern vor allem seines innovativen Geistes wegen, der seinen unnachahmlichen Stil hervorhebt, der Suche nach neuen Produktionstechnologien, neuen Materialien, und der Umsetzung traditioneller handwerklicher Arbeiten in moderne Formen. Nach mehr als 10 Jahren seit seiner Gründung ist Kundalini heute ein Unternehmen mit solider Erfahrung, unermüdlich auf der Suche nach neuen avantgardistischen Forschungstrends, ausgerichtet auf ausgefallene, bunte und mutige Gedanken. Kundalini kann sich der Zusammenarbeit mit namhaften internationalen Designern und Architekten rühmen, die dieses Ziel unterstützen und in den Vordergrund heben.

*... la lumière non seulement est dessinée, mais*

*dessine à son tour notre perception du monde et de la vie...*

Kundalini commence son activité en 1996, avec l'intuition d'une nouvelle typologie de lampes définies Corps d'Éclairage Intérieur: des produits de lighting design étudiés pour donner une lumière enveloppante et harmonieuse. La vision était en antithèse avec la plupart des productions techniques

d'éclairage de matrice rationaliste en vogue à l'époque, visant surtout à dissimuler la source lumineuse et laisser la place à une conception de l'ambiance caractérisée par des volumes de lumière réfléchi. Le développement du projet a porté à la création de formes de lumière extrêmement innovantes ainsi que courageuses. La reconnaissance sans égal que Kundalini a eue dès ses débuts l'a placé parmi les entreprises les plus publiées dans son secteur, aussi bien en Italie qu'à l'international. Mais la grande exposition médiatique de Kundalini est allée bien au-delà de l'univers des spécialistes du Design, avec de nombreuses apparitions de ses produits dans des productions cinématographiques, publicitaires, télévisées et de clips vidéo internationaux.

Des produits historiques comme le lampadaire E.T.A., la collection Shakti, le fauteuil Hara et plus récemment Bokka ou Abyss Spot sont déjà des icônes cultes des médias du monde entier.

Kundalini a été accréditée dans le milieu international du Design contemporain comme une entreprise pionnière non seulement dans le développement des thèmes introduits, mais surtout pour l'esprit innovant caractérisant son style et la recherche avancée dans les nouvelles technologies de production, des nouveaux matériaux et pour une nouvelle interprétation contemporaine du travail artisanal traditionnel.

Aujourd'hui Kundalini, à plus de 10 ans de sa création, est une entreprise qui peut compter sur une expérience solide, sans cesse orientée à l'identification de trajectoires d'étude d'avant-garde, déclinés selon une pensée fancy, colorée et courageuse. Kundalini collabore avec des designers et architectes de renommée internationale qui en partagent et mettent en exergue la mission.

*... la luz no está sólo diseñada,*

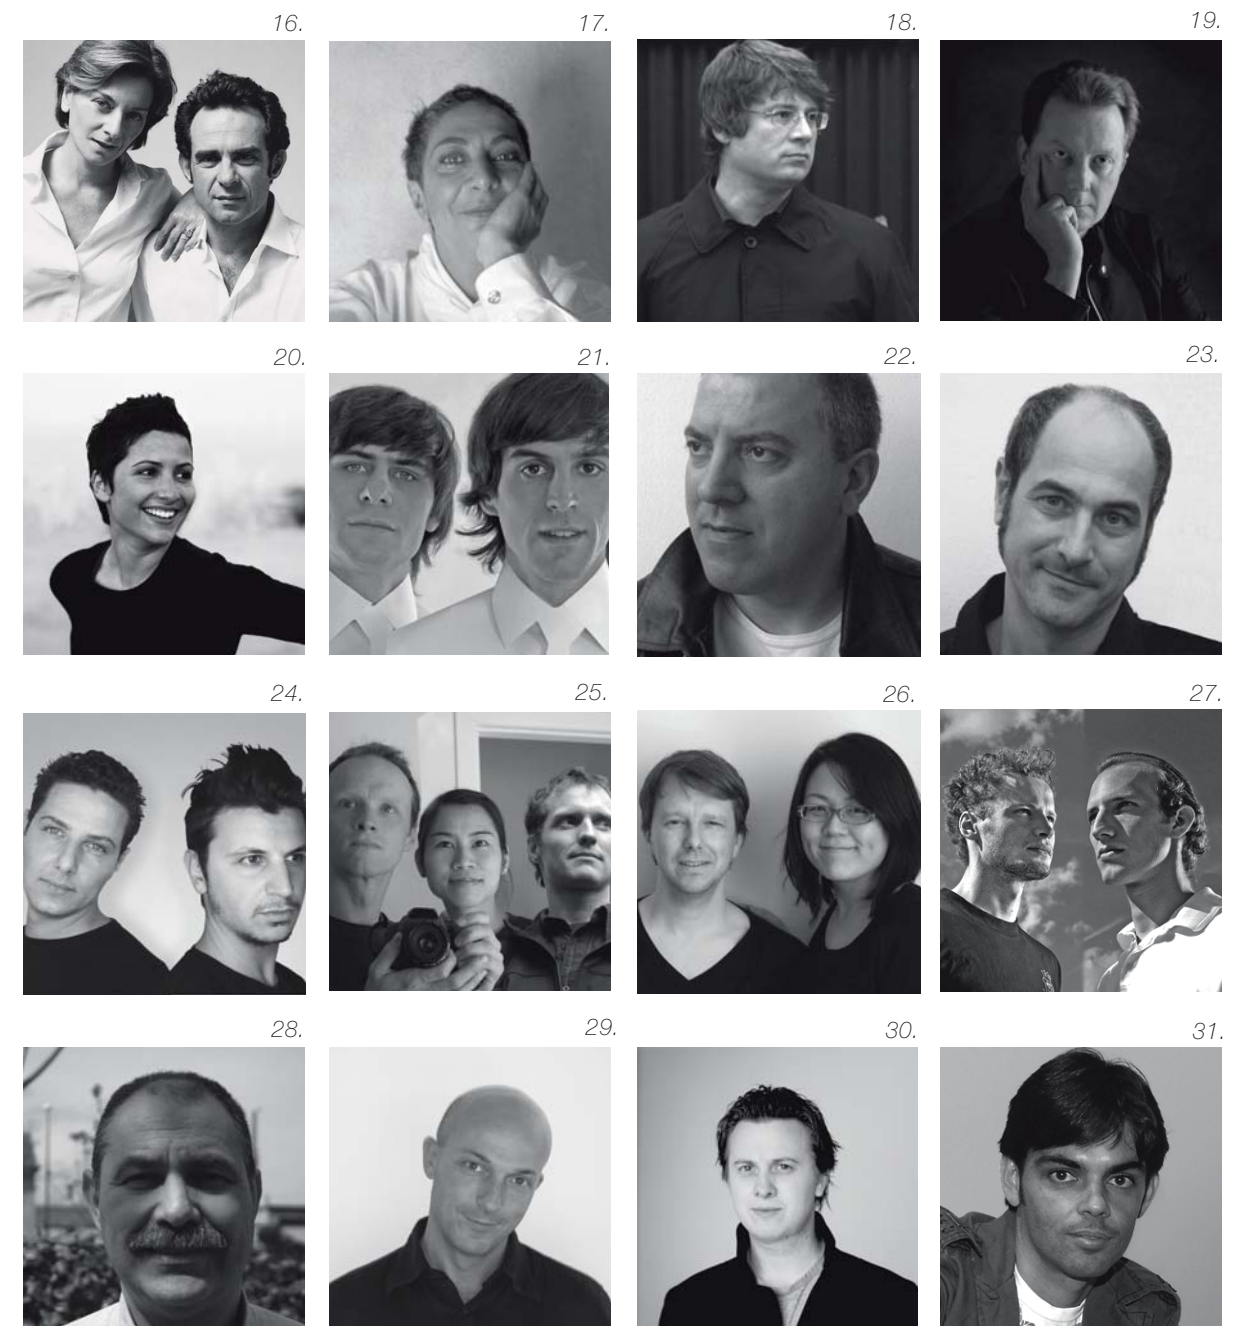

*sino que a su vez diseña nuestra percepción del mundo y de la vida...*

Kundalini inicia su actividad en 1996, con la intuición de una nueva tipología de lámparas definidas Cuerpos de Iluminación Interior: productos de lighting design estudiados para ofrecer una luz envolvente y armoniosa. La visión se consideró en antítesis con gran parte de las producciones luminotécnicas de matriz racionalista en auge en ese entonces, orientadas fundamentalmente al ocultamiento de la fuente luminosa en favor de una concepción del ambiente caracterizado por volúmenes de luz refleja.

El desarrollo del proyecto dio vida a la creación de formas de luz sumamente innovadoras y al mismo tiempo muy valientes. El reconocimiento que Kundalini ha tenido desde sus inicios es sin precedentes y la coloca en Italia y a nivel internacional entre las empresas más publicadas de su sector. Pero la gran exposición mediática de Kundalini ha ido mucho más allá del radio de recepción del área de los especialistas de Diseño, contando con numerosas apariciones de sus propios productos en producciones cinematográficas, publicitarias, televisivas y de videoclips internacionales. Productos históricos como la lámpara de pie E.T.A., la colección Shakti, el sillón Hara y más recientemente Bokka o Abyss Spo ya son iconos cult de los medios de todo el mundo. Kundalini ha sido acreditada en el ámbito internacional del Diseño contemporáneo como una empresa pionera, no sólo en el desarrollo de los temas que ha introducido, sino sobre todo por el espíritu innovador que caracteriza su estilo y la investigación avanzada en el ámbito de las nuevas tecnologías productivas, de los nuevos materiales y por la reinterpretación en clave contemporánea de las tradicionales elaboraciones artesanales.

Kundalini, a más de 10 años de su fundación, es hoy una empresa con una sólida experiencia, incesantemente orientada a la identificación de líneas de investigación de vanguardia interpretadas según un pensamiento extravagante, multicolor y valiente. Cuenta con la valiosa colaboración de diseñadores y arquitectos de fama internacional que comparten y destacan la misión de la empresa.

#### GENERAL SALES CONDITION EXTRACT

1. Goods delivery have to be considered Ex Factory.
2. The price includes: package, bulbs, unless otherwise specified, and low voltage transformer.
3. Prices included in the price list refer only to technical standard indications. Any special request for different standards will be subject to special quotation.
4. Goods are carefully and accurately packaged, Kundalini s.r.l. declines all responsibilities for any damage caused by the transport.
5. Goods travel to the customer own risk, even if sent on free delivery.
6. Any claim related to apparent and/or occult defects has to be communicated to Kundalini s.r.l. by mail or fax within 8 days from the date of receipt of the goods.
7. Price list data can be changed by the Producer in any moment without advanced notice.
8. Bulbs are included in the package of each product. Claims due to their break and/or their missing are not accepted. The bulbs will be supplied following their availability in the market and respecting the new regulations.
9. Suspension lamps are supplied with 1.8 meters long cables. Possible different lengths can be produced on demand.
10. Product colors can differ from what is shown in the catalogue.
11. Customers are recommended to read carefully the instructions contained in the product box and scrupulously observe the use of the proper bulbs.
12. The parties refer to Italian Law and specifically the Court of Milan for every dispute.
